Editorial Review:

Product Description:

Stop fighting engine rumble, speaker rattle, road noise and buzzing vehicle parts! Apply Dynamat Xtreme to your vehicles resonant surfaces and enjoy improved clarity, loudness and bass response from your car stereo. High-performance Dynamat Xtreme is lighter than Dynamat Original, four times more effective, requires no heat to apply and is recommended for vehicle tops, sides and contoured areas. Dynamat Xtreme is coated with aluminum for high temperature areas such as firewalls and floors. Kit contains nine 18" x 32" pieces of Dynamat Xtreme for rear decks, doors, floors and trunk floors. Unlike Dynamat Original, Dynamat Xtreme is also recommended for trunk lids, roofs, quarter panels and under-hood installations.

Customer Reviews Average Rating:

Rating: - Dynamat Bulk Pack

Excellent product. Reduced road noise in my 1994 Ford Taurus quite a bit. Glad I did it.

Rating: - Does what it says!

I used the entire thing in my Lancer GT 08 (doors & trunk) Its just about enough since its not a really big car. Simply put, this product does exactly what it says! No more rattles, no vibrations, Clean Sound, Deep/Hard Hitting Bass.. even @ low volumes! According to me, atleast 60% of road noise is also blocked off! I still need to install the hoodliner.. no time!! Dynamat Xtreme seems heavy though, in the box, but once its installed.. no worries! & for the Price, I'd recommend anyone with a car ... Rating: - Great Sound Damping Product

This is a great product for extraneous noise control in automotive applications. Just under two boxes covered a 2001 Mustang GT from the rear light panel in the trunk all the way to the dash/firewall, including both doors. Doors now have a solid (high end European car) sound when closing, and everyone who's ridden in the car can't believe how much quieter it is inside now. I'd say it cut the noise from the supercharged 4.6L with Flowmaster exhaust by at least half, and road noise is now all but non ... [Read More](#)

Rating: - dynamat bulk sheets

I bought the bulk package to line the 4 doors of my 2007 Toyota Tundra DC since i was installing new speakers. The product works as stated, easy to apply and reduced the door vibration as well. Road noise was reduced as well, I will be installing some under the carpet to silence more road noise. Buy the bulk and save money, be sure to have a wooden roller and a heat gun. I did my on hot summer days and the mat was flexible and sticky but still need to be rolled into contour areas.

Rating: - Great purchase experience!

Product arrived on time and as described by seller. Great experience all around, will purchase from again in future as I'll need more of the same product!
